Crafted Quality

For over a decade we have produced architectural quality concrete details at our workshop in Richmond BC, Canada. We have defined our craft - creating our trademark look with unique textures that take skill, expertise and patience.

Concrete is a timeless material and demands no compromises in its process to ensure performance in rigorous outdoor conditions. It is this meticulous approach that has guided our development of these firepits in their integrity of design. We are proud that they embody the finest in craftsmanship, and it is our hope that you will find the style that is just right for your space.

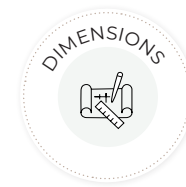

We welcome you to join our family by the fire.

Bespoke Accents

Our premium accent colours turn already stunning fire features into bold statements.

These bright colours are integrally mixed during the manufacturing stage pigmenting the concrete straight through for maximum longevity.

Premium accents colours are available for all standard fire pit models.

Please note premium accents require special maintenance - speak to your dealer for more details.

DreamCast

Design & Production

Dreamcast is a family-run business originally founded by internationally acclaimed wild-life sculptor, Sergei Traschenko.

With Sergei's passing in 2010 dreamcast's foundation in art is continued by his wife and daughter. Dreamcast brings you a modern product that supports local artisan work by blending the latest production technology with classical hand-finished detailing to ensure trusted quality.

We understand that beyond quality, functionality and design, factors such as environmental friendliness and tested safety are key deciding features. Dreamcast incorporates post-consumer materials into its mix and our firepit line is tested and certified to give you peace of mind.

Warranty Information

All our concrete products and burner systems are backed by a limited warranty.

Full warranty information available on our website.

Safety Certified through North America ✓

What does the ETL mark mean?

The ETL certification mark means
our gas fire pits are certified by
Intertek Laboratories

What does it take to be a certified appliance?

- ✓ Testing a full appliance goes beyond just a day at the lab.
- ✓ All components of a system must meet strict standards for quality and performance.
- ✓ Each fire pit system has been rigorously tested in all weather conditions from severe winds to heavy rain for safe operation.
- ✓ The firepit control system itself must be safe to use.
Heat outputs are carefully measured and checked to enforce reliable heat performance
- ✓ To maintain certification regular in-house testing must be conducted to ensure firepits maintain approved certification requirements
- ✓ Our factories are visited regularly by 3rd Party Inspectors to ensure that there are no substitutions to approved critical parts and to check our operating procedures and systems.

*Safety is an ongoing
commitment - not just a
piece of paper.*
